

Artwork guidelines

Custom-printed PREMIUM whiteboards

Place logo's, smaller images or texts in the Viewing size to have a safe distance from the frame.

Use the Artwork size for background colours or background images.

INDESIGN TEMPLATES

The easiest way to design your custom-printed PREMIUM whiteboard is to use the InDesign templates that are provided by Legamaster. In the InDesign templates, the right artwork and viewing sizes are already pre-set so you can start with your board design right away.

CREATE YOUR OWN TEMPLATE

In case you want to create your own template (e.g. in Photoshop or Illustrator), please use the artwork size to create your design file and then add the viewing size.

Important note:

- Background colours or images can continue to the full artwork size to prevent white lines near the frame of the board.
- Place logo's, images or texts within the viewing size to ensure sufficient distance from the frame.

BOARD SIZE (mm)	ARTWORK SIZE (mm)	VIEWING SIZE (mm)
300 x 450	278 x 428	264 x 414
450 x 600	428 x 578	414 x 564
600 x 900	578 x 878	564 x 864
750 x 1000	728 x 978	714 x 964
900 x 1200	878 x 1178	864 x 1164
900 x 1800	878 x 1778	864 x 1764
1000 x 1500	978 x 1478	964 x 1464
1000 x 2000	978 x 1978	964 x 1964
1200 x 1500	1178 x 1478	1164 x 1464
1200 x 1800	1178 x 1778	1164 x 1764

ARTWORK REQUIREMENTS

- ✓ All images should have a minimum resolution of 300 dpi.
- ✓ Full colour artwork should always be designed in CMYK.
- ✓ Export your final design as PDF file.
